

AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application:

1. (currently amended). A shaving razor blade unit comprising
a housing, and
~~a shaving surface defined by~~ a group of at least five parallel blades
supported by said housing, the distance from the cutting edge of a first blade of
said group to a last blade of said group being between 3.8 mm and 4.6 mm,
wherein the blades (28) are each mounted on respective support members
(400) that are each movably mounted on said housing, said support members
(400) having a blade platform portion (406) for supporting a blade (28) and a
depending base portion (402) angled relative the blade platform portion (406),
said depending base portions (402) being arranged generally perpendicular
to an imaginary shaving surface approximately intersecting the blade cutting
edges (408), and wherein
the blades (28) have a blade length (LB) extending rearward from the
cutting edge (408), said blade length (LB) being less than 1 mm.
2. (original). The blade unit of claim 1 wherein said distance is between 4.0 mm and 4.4 mm.
3. (original). The blade unit of claim 1 wherein said distance is between 4.1 mm and 4.3 mm.
4. (original). The blade unit of claim 1 wherein the span between cutting edges is between 0.95 mm and 1.1 mm.
5. (currently amended). The blade unit of claim 1 wherein the exposure of blades between said first blade and said last blade is approximately 0. θ .
6. (original). The blade unit of claim 1 wherein said blades have a blade tangent angle between 21° and 22°.
7. (original). The blade unit of claim 1 wherein said first blade has a negative exposure.
8. (original). The blade unit of claim 1 wherein said last blade has a positive exposure.

9. (Cancelled). ~~The blade unit of claim 1 wherein said blades are movably mounted with respect to said housing.~~
10. (Cancelled). ~~The blade unit of claim 5 wherein said blades are mounted on support members that are movably mounted on said housing.~~
11. (currently amended). A shaving razor blade unit comprising
a housing, and
~~a shaving surface defined by~~ a group of at least five parallel blades
supported by said housing, said blades having an average interblade span between
0.95 mm and 1.15mm,
wherein the blades (28) are each mounted on respective support members
(400) that are each movably mounted on said housing, said support members
(400) having a blade platform portion (406) for supporting a blade (28) and a
depending base portion (402) angled relative the blade platform portion (406),
said depending base portions (402) being arranged generally perpendicular
to an imaginary shaving surface approximately intersecting the blade cutting
edges (408), and wherein
the blades (28) have a blade length (LB) extending rearward from the
cutting edge (408), said blade length (LB) being less than 1 mm .
12. (New). The blade unit of claim 1 wherein said blade length is less than 0.9 mm.
13. (New). The blade unit of claim 12 wherein said blade length is about 0.85 mm.
14. (New). The blade unit of claim 11 wherein said blade length is less than 0.9 mm.
15. (New). The blade unit of claim 14 wherein said blade length is about 0.85 mm.
16. (New). The blade unit of claim 1 wherein said support member base portion (402)
extends rearward of a blade end (450).
17. (New). The blade unit of claim 11 wherein said support member base portion (402)
extends rearward of a blade end (450).
